WORK/PROJECT EXPERIENCE

● OneSeason (Travel Web Application)

ROCKFORD INTERNATIONAL LLC

August 2021 - Jun 2022

I was responsible for leading the team for this project to develop a digital platform connecting hoteliers and travelers. OneSeason provides opportunities for hoteliers and related business owners to increase their revenue intensively while at the same time serving as a complete guide and resource to all travelers by providing every features required to make their journeys/adventure a complete experience. These features were implemented using technologies like React JS, Node JS, Express, Bootstrap CSS and mongo DB which resulted in a clear, responsive, easy/quick navigation and fast search mechanism which aid the visitors and travelers find what they are looking for faster. Therefore reducing bounce back by at least 60%, thus improving the ranks in search engines towards 35% and increasing the response time of every request by 45%.

● Perfect Sharon (E-commerce Web Application)

ROCKFORD INTERNATIONAL LLC

February 2021 - July 2021

Perfect Sharon was designed to reflect a modern take on women's underwear with the focus of offering simple and sporty-style bikinis that are comfortable, affordable, attractive and pleasant manner. My role was to provide an E-commerce application that is accessible, easy, fast, smooth in navigation, user friendly, and can scale in terms of traffic. I was able to achieve these by using technologies like Python / Django for server side and React JS for frontend.

● EaglesEye (Properties Web Application)

ROCKFORD INTERNATIONAL LLC

March 2020 - December 2020

Developed a property web application targeted for users in UAE to have a seamless platform where sellers, buyers, and tenants are able to connect and provide a common and reliable source for the UAE real estate market. Intended to be a one-stop database of available listings of all properties for sale and rent. With my combination of modern practices in React, JavaScript, Typescript, CSS, and HTML Node.js improved the time of page for the average user by 2 minutes. We were also able to increase the page views per session by 22%.

● Mobilies.io (Website for Mobile Development Services)

MOBILIES

October 2019 - February 2020

Developed a website showcasing my services with style. Built to outline all the information and benefits of subscribing to my development services. I developed this website using one of PHP's most used platforms, WordPress. Today I improved the speed and responsiveness of the website thus increasing the number of traffic by 15% using and creating advanced plugins. The smoothness of the website has attracted a volume of potential clients for these services by 20% so far.

● Turbine (Web Application for Growing Businesses)

1 BMT

September 2018 - July 2019

Built Turbine as a common ground to enable both influencers and promoters to connect seamlessly to grow their business and generate income for themselves. I used top industry PHP leading library's Laravel thus saving time and resources by 60% generating a must-have common feature in almost every application like Authentication, Registration, and Logins to mention a few. Overall using the Laravel MVC architecture by avoiding code duplication and separating business logic from the presentation logic, coupled with the PHP Active Record implementation we improved our development time by 30% and project scalability by 15%.

EDUCATION AND CERTIFICATIONS

● Associate Degree in Computing

INFORMATICS ACADEMY SINGAPORE

Jun 2006 - July 2008

● SUN Certified Programmer

SUN MICRO SYSTEMS

Jun 2009 - July 2011

● Cisco Certified Network Associate (CCNA)

CISCO

March 2010 - April 2012
